Paediatric First Aid (2 days)

Assessment

- Tutor assessed through practical demonstrations
- Completion of a multiple-choice theory assessment

Additional information

If you are caring for infants in the Early Years Foundation Stage (aged 0 to 5 years inclusive) it is important to note that new legislation requires all newly qualified child carers to have Paediatric First Aid training. This course meets the requirements of the Early Years Foundation Stage and is necessary for people who care for children in any professional setting (e.g. school reception classes, pre-schools, nurseries and child-minders).

Early Years childcare providers can choose to train their staff to hold either the full Paediatric First Aid qualification (2 day course) or the shorter Emergency Paediatric First Aid certificate (1 day course). **It is a legal requirement** for at least one person with a valid full Paediatric First Aid qualification (2 day course) to be available at all times within a professional child care establishment. This includes cover for sickness and annual leave and to accompany children on trips or excursions.

You will perform CPR on infant, child and adult manikins. However adult CPR is not assessed or part of the qualification.

Using an AED (defibrillator) is demonstrated and candidates also have the opportunity to practice on one.
